MESSAGE FROM VC

Technical education is a key enabler of growth. Transforming India's economy is possible mainly by spreading the base of technical education and making it accessible to the common man. The demand for Engineers both in reengineered core specializations and emerging disciplines has been growing tremendously throughout the world.

JNT University Anantapur is committed to provide professional education with thrust on creativity, innovation, continuous change and motivating environment for knowledge creation and dissemination through its effective Quality Management System. The outcome based education system will be followed in terms of syllabi revision and delivery of instruction.

The Vice Chancellor is thankful to the Government of Andhra Pradesh for sanctioning JNTUA College of Engineering Kalikiri in Chittoor District from the academic year 2013-14. This is a 3rd constituent college under JNTU Anantapur to catering to the needs and dreams of rural students of Rayalaseema in particular and Andhra Pradesh in general. The proposed site of JNTUA College of Engineering Kalikiri is just 45 KM away from Madanapalle on the way to Tirupati and just 75 KM away from Tirupati and lying on NH 205.

I am happy to share that the new Engineering College will come up in the sprawling area of 110 acres in Kalikiri with the following B. Tech Courses with 60 seats in each course from the academic year 2013-14.

1. **Civil Engineering**
2. **Mechanical Engineering**
3. **Electrical and Electronics Engineering**
4. **Electronics and Communication Engineering**
5. **Computer Science & Engineering**

In the next academic year i.e., 2014-2015 one more new course on Food technology will be added up.

Initially the class work will be started from Government Polytechnic College Kalikiri which is equipped with all infrastructural facilities. In due course of time all new buildings will come up in the proposed site of JNTUA College of Engineering Kalikiri in Chittoor District. The regular faculty will be deputed to the new upcoming college and the permanent faculty will be recruited exclusively in due course of time

I am quite optimistic that the academic pursuit of students in JNTUA College of Engineering Kalikiri will be fruitful and enjoyable in every aspect

Wishing you the very best,

[Prof. K. LAL KISHORE] 08/07/2013
